State general education standards

State general education standards are mandatory for anyone to develop and implement comprehensive education program. State general education standards require the key objectives and tasks of general education programs, the minimum content, including the compulsory subjects and standards, as well as student learning assessment principles and procedures and mandatory national tests.

General education programs

General education program classification, names and codes are determined by the Cabinet of Ministers. General Education Program is a document which sets out the educational program goals and objectives, educational content, curriculum implementation plan, the requirements for prior learning, learning assessment criteria and procedures. It also sets out assessment and reasoning of necessary personnel, financial and material resources for the implementation of educational programs.

NCE develops samples of learning subjects programs, which are used by pedagogues to create content and plan of lessons.
