# Deep-loading racks

**Deep-loading racks can increase pallet space by up to 70%.** Deep-loading racks are ideal for warehouses that store a small variety of items in large quantities.

In many cases, using both deep-loading racks and standard pallet racks ensures the best fill rate.

# Deep-loading racks

## Other benefits of deep-loading racks

- Fewer aisles
- Enables the proper protection of goods
- Shorter material flows in the warehouse
- LIFO (last in, first out)

# Mobile racks

EUROPEAN UNION  
European Regional  
Development Fund

WINNOVA  
LĀNSIRANNIKON KOULUTUS OY

# Mobile racks

- Mobile racks clearly provide more shelf space than traditional shelving solutions.
- Mobile racks allow for the construction of a smaller warehouse or more efficient use of existing space.
- Mobile racks provide up to 30-80% more storage space than traditional shelves.

EUROPEAN UNION  
European Regional  
Development Fund

Project partners:

WINNOVA  
LÄNSIRANNIKON KOULUTUS OY

# Mobile racks

- Mobile racks are also suitable for storing heavy or large items.
- Remote control allows easy access to goods.
- You can use covered trolleys or trolleys equipped with different shelving solutions.

# Pallet flow racks

- Pallet flow racks are suitable for warehouses and production units that handle large quantities of a small variety of items.
- With pallet flow racks, the goods are loaded in one end onto a gravity flow conveyor or motorised conveyor, which moves them to the other end for picking and distribution.

# Pallet flow racks

## **Benefits of pallet flow racks:**

- Efficient use of space. Up to 90% of floor space can be reserved for the racks.
- Enables automated FIFO (first in, first out) storage.
- Requires fewer aisles.

EUROPEAN UNION  
European Regional  
Development Fund

Project partners:

# Narrow aisle racks

Narrow aisle rack provides 30% more pallet space compared to a traditional pallet rack.

Narrow aisle racks allow efficient use of the height available in the warehouse.
